Sensorimotor-Focused EMDR

A New Paradigm for Psychotherapy and Peak Performance

Arthur G. O’Malley, EMDR Europe Accredited Consultant for Children Adolescents and Adults

Therapists are traditionally trained in either physical approaches such as physiotherapy or talking therapies such as counselling or CBT. But this important new book is based on the idea that the mind and body are one, encouraging therapists towards holism rather than taking a symptom based approach. Exploring how the automatic nervous system impacts on their client when exposed to situations of safety and danger, the book explains how different parts of the brain react, and how this knowledge can be integrated within the therapeutic relationship, particularly around issues of trauma or anxiety. It will enable a new perspective on both recovery and performance.
